

Discover a new dining Experience

Nikkoku Seifun Co. Ltd.
Company Brochure 2024

Discover a new dining Experience from Nagano, Known for Health and Longevity

If we consider the 'declining birth rate and aging population,' combined with an increase in 'the diversity of food choices,' it is easy to recognize the changing attitudes of people toward food. Recently there has been a paradigm shift from 'quantity to quality.' Nowhere is this more evident than in 'Shoku,' or 'Japanese food culture.' Eating better, healthier food in moderation rather than eating to excess can lead to a general sense of well being. These days, the fact that food is delicious is all too often taken for granted. Concerns about food safety and security have also become a priority.

The longevity of Japanese people is well known all over the world, and Nagano Prefecture boasts the highest of all Japan. We at Nikkoku Seifun have thoroughly researched knowledge and wisdom relating to healthy lifestyles that have been passed down through generations in the area. Having scientifically confirmed this knowledge, and understanding the importance of food safety, we aim to provide the best quality flour products to enrich your life. We are striving to realize our ideal that through a combination of tradition and modernity we can create a new variety of foods.

Our corporate philosophy is 'Dreams, Effort, and Appreciation.' Based on this philosophy, we hope to find fulfillment by providing ways to enhance your dining experience, and bringing joy to your life. Furthermore, every member of Nikkoku Seifun is committed to the aspiration that our company can become an integral part of our local community.

President
Norio Koyama

Group Philosophy

Dreams, Effort, and Appreciation!

We encourage every member of the Nikkoku Seifun Group to follow their own 'dreams' in order to find fulfillment, and make every 'effort' to realize them, while showing 'appreciation' to the people who have given us the reason to strive to be the company we are today. Here in Nagano, Nikkoku Seifun is contributing to the development of the local community through co-operation with its people. Based on our philosophy 'Dreams, Effort, and Appreciation!' we are developing as a business that makes every one of our team happy.

What Nikkoku Aims for

Creating Values

Nikkoku aims to 'create values'. We are committed to 'creating and developing new products,' and 'proposing new dining trends' in order to identify and meet true customer needs for foods.

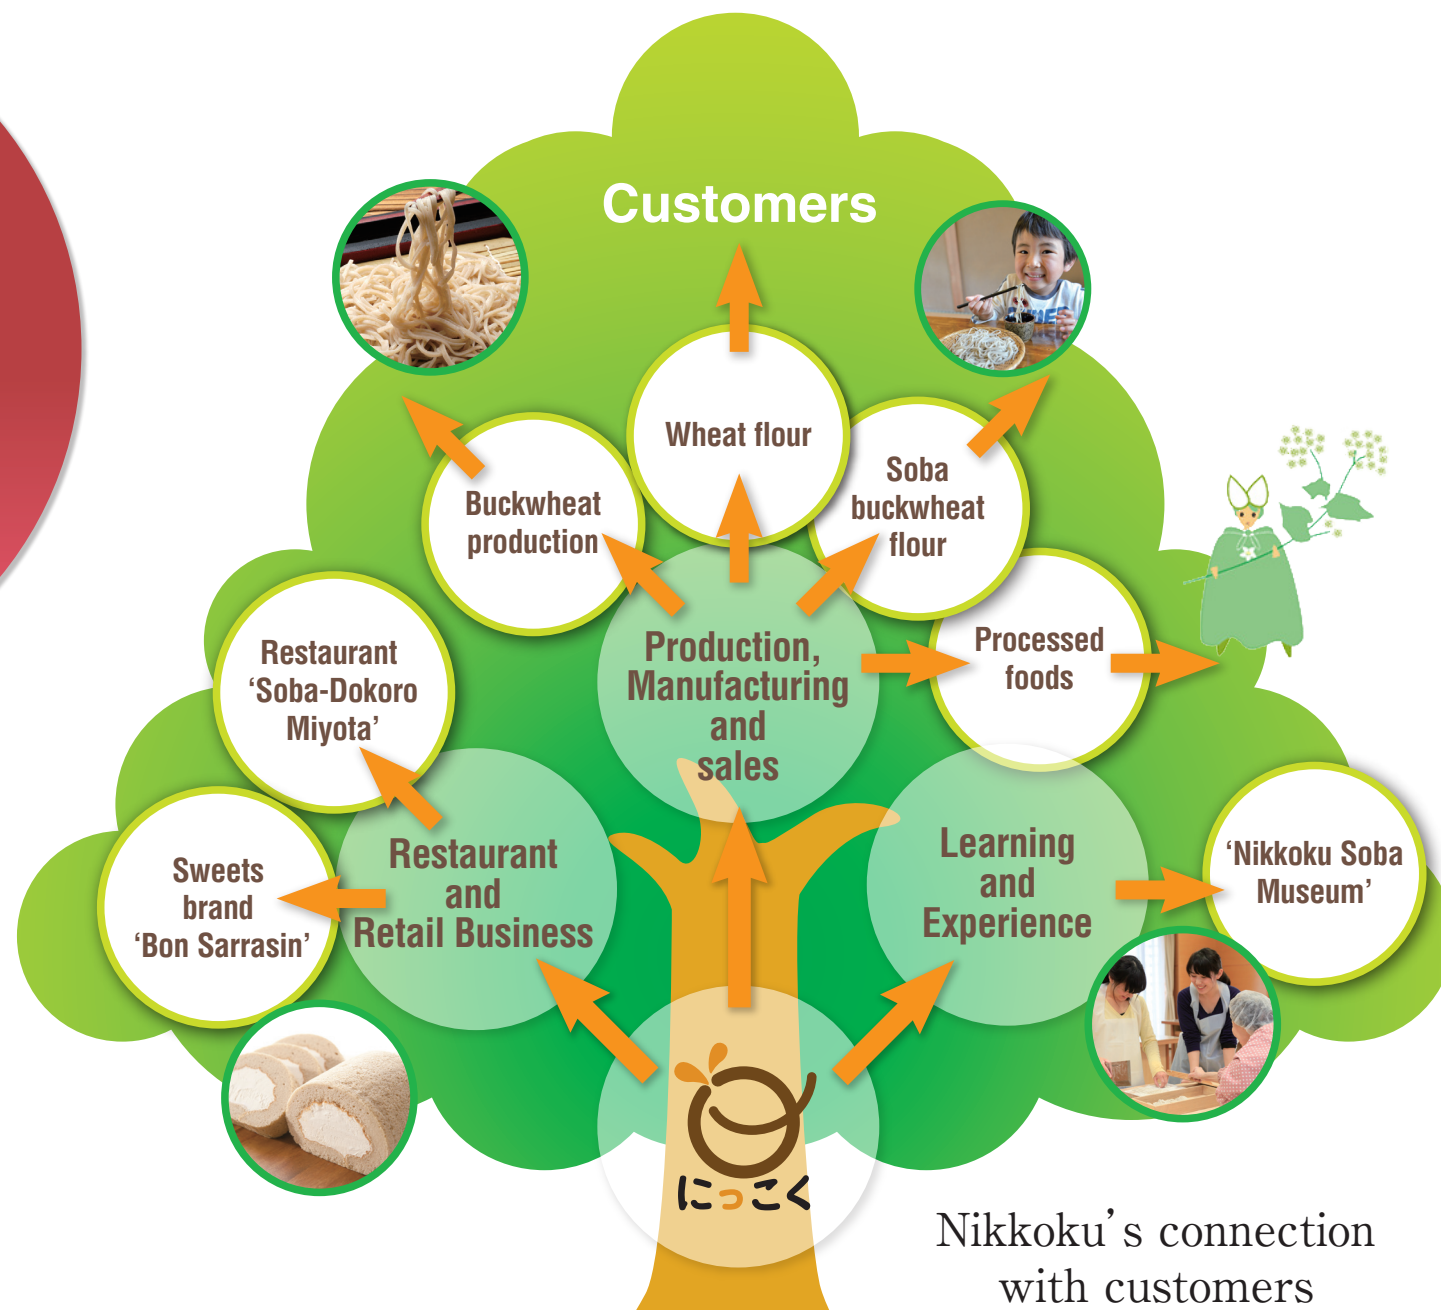

In response to a range of customer requests, we are determined to develop products that are new and innovative, while still drawing on the benefits of traditional food. We shall also work on ways to meet food challenges brought about by a declining birth rate and an aging population, to make people's dining experience more enjoyable.

We will continue to provide you with a range of safe and secure processed food made from soba buckwheat and wheat.

We would also like to express our gratitude to all the people we have gotten to know through our business endeavors thus far. We hope to share our dreams with you.

Essential Opportunities

Nikkoku aims to pursue the potential of soba buckwheat flour foods, develop new and reliable foods, raise people's interest in soba through new facilities, and provide high quality, delicious foods in our stores.

Nikkoku's connection
with customers

Discover a new dining Experience

Concept

In Nagano we harness the power of nature, the clean air, the clear water and the fresh wind, to produce delicious foods which bring satisfaction to your dining experience. Our logo symbolizes a factory sprouting from the earth and the energetic power of Mother Nature. It also shows our strong commitment to bringing enjoyment and satisfaction to your dining table. We believe that our goals are not only to create and develop new products and set new dining trends, but also to establish the best production procedures according to our quality management system, in order to manufacture products with safety and security guaranteed to our customers.

We aim for a sustainable society.

Nikkoku Seifun is, and will be, working to realize a sustainable society where no one will be left behind, through our business activities focusing on soba, a gift from the earth.

Priority Issue 1 Reducing by-product

12 RESPONSIBLE CONSUMPTION AND PRODUCTION

13 CLIMATE ACTION

• We work on reducing the volume of by-product generated in Matsumoto Factory.

Priority Issue 2 Reducing abandoned farmland by promoting contract farming of soba

8 DECENT WORK AND ECONOMIC GROWTH

11 SUSTAINABLE CITIES AND COMMUNITIES

12 RESPONSIBLE CONSUMPTION AND PRODUCTION

15 LIFE ON LAND

• We reduce the volume of abandoned farmland by promoting contract farming of soba in cooperation with Nagano Prefecture's farmers.

Priority Issue 3 Promoting development and sales of products made from local resources

8 DECENT WORK AND ECONOMIC GROWTH

11 SUSTAINABLE CITIES AND COMMUNITIES

12 RESPONSIBLE CONSUMPTION AND PRODUCTION

15 LIFE ON LAND

• We actively work on developing and selling new products made from soba, dattan soba, wheat, and rice all locally sourced in Nagano Prefecture.

Ensuring complete food safety through our quality management system.

Quality Control

ISO22000 certificate

Nikkoku Seifun have obtained the ISO22000 certificate, the international standard of quality management systems, in order to provide our customers with safety and security.

【Certification organization】Union of Japanese Scientists and Engineers
【Certification number】JUSE-FS-204

* For more information, Visit our WEBSITE.

Quality Control

FSSC22000 certificate

Hokkaido Soba Seifun Co. Ltd. is group company of the Nikkoku Seifun, has obtained the FSSC22000 food safety system certificate, in order to guarantee our customers and secure products.

【Certification organization】JIA-QA Center
【Certification number】[Hokkaido Soba Seifun Co. Ltd.] JS0058

* For more information, Visit our WEBSITE.

Quality Control

Consistent quality management system

Nikkoku Seifun has established our own quality management system to comply with management standards, by designating a point of control for each process or procedure, from the selection of ingredients to manufacturing and logistics.

【Analysis test/Test items】Physics and chemistry tests, bacteriological tests, allergenic tests, color tests and others

*Analysis tests and test items vary according to products.

Quality Control

Activities on 'positive list system for agricultural chemical residues in foods.'

According to the Positive List System for Agricultural Chemical Residues in Foods, we have our products tested for agricultural chemical residues at Quarantine Stations run by the Ministry of Health, Labour and Welfare. In addition, we also voluntarily carry out our own pesticide residue test on soba wheat, as well as giving instructions directly to farmers to avoid the use of agricultural chemicals, while also confirming food safety by carrying out inspections of farms.

* The results of the voluntary tests can be found on our web site.

Quality Control

Traceability system

Nikkoku Seifun has secured the traceability of our products by thoroughly controlling records of each procedure, including receiving ingredients, manufacturing and delivering products. Our traceability system is so well-established that we can deal with any problem that may arise, by indentifying and isolating problems as they occur.

We aspire to always be an environmentally friendly company.

The Nikkoku Seifun Group fully understands the impact of our business activities on the natural environment. We have been promoting the efficient usage of energy and natural resources, and environmental conservation.

1

We make every effort in the areas of environmental preservation and improvement, while observing all laws and regulations.

2

We promote the proper control and decrease of industrial waste and recycling of resources.

3

We promote energy and resource-saving by using a solar energy generation system and gas boilers.

We bring out the best in ingredients, and propose totally new flavors.

From raw materials for ingredients to processed foods, we have been making every effort to create totally new and delicate flavors, working on the research and development of grains such as soba buckwheat and wheat. We also suggest a variety of ideas of how to enjoy new and modern dining experiences.

Pursuing further product development to meet our customers' demands.

Utilizing our knowledge and technology, we are able to put our customers' requests into shape. According to the type of product requested, and the customer's production environment, appropriate proposals will be put forward to meet specific requirements.

Presentation room

NEWS: Development Example

Series of Gluten-Free (GF) Products

(Bread flour, cookie flour, okonomiyaki flour, and tempura flour)

In response to the expansion of the GF market, we have been developing GF products mainly focused on soba flour. Compared to other GF products including rice flour and soy bean flour, the soba flour is more nutritious and flavored. The only remaining problems had been the texture and processability, but finally we made improvements to reach commercialization by pregelatinizing only a specific part of soba seeds to make their particle-size composition fixed. This is an excellent example of expanding the possibility of soba.

Shinshu-no-megumi, Soba tea

(Food with Function Claims, Notification number: G196)

Registered as a Food with Function Claims since resistant dextrin is blended as dietary fiber, this is a ready-to-drink soba tea blended with Nagano Prefecture's Dattan soba and regular soba. It serves to reduce the absorption of sugar and fat in food. We are proud of realizing our development keywords, soba, Nagano Prefecture, health, and good taste, through developing this product. This drink is sure to work well for living a healthy everyday life.

‘Food Safety’ is our paramount concern, which emphasizes a clean manufacturing environment.

Nikkoku Seifun has made ‘Food Safety’ its highest priority, and is committed to hygienic management and quality control. In our factories, carefully planned measures are taken throughout the whole manufacturing process. The utmost care is taken when receiving raw materials and delivering final products. Automated production lines are used to ensure a clean production environment. We comply fully with hygiene regulations and hygienic zoning, and there are strict control systems in place to avoid product tampering. The establishment of our unique production system is based on years of acquired know-how, and means we can quickly and flexibly fulfill a range of customer requests.

We have a variety of selected soba flour.

Nikkoku Seifun provides you with only selected flour from the Nagano area, the center of soba production. The latest facilities and technologies, along with our thorough management system, allow us to meet a wide variety of customer needs. Our safe and secure soba flour products are ready for your dining experience.

Products for business use

- Soba flour
- Soba flour mix
- Soba flour only for hand-made soba
- Sterilized soba flour
- Coarsely ground soba flour
- Special soba flour

Product for home use

- Soba flour

Selected soba flour products

‘Shinanoji’ soba flour

With excellent tone and delicate flavor, made from only selected ingredients.

‘Fuki’ Dattan soba flour

With unique flavor and tone. Rutin, a nutritional element rich in Dattan soba, can be more effectively delivered to the body through our patented production process.

‘Seiro’ sterilized soba flour

Sterilized by our special technology, Seiro has excellent flavor and tone, and a high resistance to discoloration, which improves the shelf life of soba made from this flour.

‘Shirane Aoi’ soba flour for hand-made soba noodles

The selected raw materials provide an excellent taste and flavor. It allows you to make soba noodles in an easy and fun way. We have also stone-milled flour.

‘Shinanoji Series’ soba flour mix

According to customer requests, flour can be mixed depending on usage, such as for fresh soba or dried soba. Optimum flour combinations reduce the burden on customers making soba noodles.

Our selected wheat flour increases the range of delicious flavors.

Nikkoku Seifun provide you with safe, secure, and selected wheat flour as an ingredient for bread, cakes, sweets, noodles, battered tempura and other foods. Due to our thorough management system, the flour can satisfy a variety of demands our customers have.

Products for business use

- Wheat flour for business use: bread flour, cake flour, noodle flour, and tempura flour

Selected flour products

'Toku Tsubasa' flour for bread

Selected flour, rich in gluten, excellent for bread making.

'Ayu' cake soft flour

Made from only select wheat. With an excellent color tone and flavor, exclusively for cakes.

'Ushiwaka' wheat flour for Chinese noodles

Selected flour for Chinese noodles, one of our selected products. It has a rich hue and texture.

'Menkui' wheat flour for noodles

Flour for noodles, rich in color, luster, and elastic texture. It maintains its firmness after being boiled.

'Hana-azumi' binding flour for soba noodles

This is binding flour for soba noodles, made of 100% locally sourced wheat from Nagano prefecture.

Our selected wheat flour increases the range of delicious flavors.

We provide our customers with a variety of wheat products made from carefully selected ingredients produced and grown in Nagano Prefecture. These products clearly reflect local characteristics.

Products for home use

- Suiton mix
- Tempura batter mix
- Hard flour
- Soft flour
- Okonomi-yaki mix
- Tako-yaki mix
- Pasta
- Hotcake mix

Selected wheat flour food products

Wheat flour grown in Nagano Prefecture (Medium wheat flour)

Wheat flour grown in Nagano Prefecture (Medium wheat flour)

This is selected wheat only grown in fertile soil of Nagano Prefecture. You will fully enjoy the genuine good taste of flour made of locally grown wheat.

'Oishii Series' Oishii suiton

Suiton is a well-balanced dish with a variety of meat, fish or vegetables provided at once. Our Oishii Suiton is a new type of suiton flour mix which gives dumplings a simple taste along with a smooth and chewy texture. Also good for making udon noodles.

'Hanakoromo' and 'Hanakoromo Light' : Tempura batter mix

This is flour exclusively for tempura, made with carefully selected ingredients, allowing anybody to create tasty tempura easily. Adding rice powder locally grown in Nagano makes tempura light and crispy. The crispy texture lasts even after the tempura gets cold.

'Okonomi-yaki Mix' and 'Tako-yaki Mix'

These special flour mixes are made of selected ingredients with as few food additives as possible. The wheat flour used is 100% locally produced. Specially selected yams are also added to it to ensure a softer texture.

We provide you with a variety of styles from our 'soba culture'.

Soba has a high nutritional value, including vitamins, minerals, and amino-acids, which are vital to our health. Examples include such as vitamin B1, vitamin E, copper, and magnesium along with rutin. We bring you a wide variety of the best aspects of soba, rich in nutrition and flavor.

Products for business use

- Soba tea
- Dattan soba tea
- Flavorful dattan soba tea
- Soba pasta
- Galette mix
- Soba rice
- Frozen soba galette

Products for home use

- Soba tea
- Dattan soba tea
- Soba rice
- Soba pasta
- Galette flour mix
- Dried soba noodles
- Fresh soba noodles

Selected soba food products

'Soba tea'

This is a mild grain tea made from roasted "Soba-no-mi," or soba seeds. With no caffeine and zero calories, this tea is good for every generation, from little children to elders.

'Dattan soba tea'

This is a fresh grain tea made from roasted "Dattan soba-no-mi," or Dattan soba seeds.

'Dried soba noodles' and 'Fresh soba noodles'

We produce 'Shinshu Soba' noodles both in dry and fresh forms to make your dining experience richer. They are carefully made here in Shinshu, especially known for its rich nature and soba making.

'Galette flour mix'

We have developed a new type of galette flour mix to solve the problems of making quality galette dough. Without proofing, you can make delicious galette, crispy on the outside and moist on the inside.

'Soba rice'

Soba rice has a uniquely smooth texture with a subtle pop. Its taste is so simple and light that it can be easily arranged and is perfect for various cuisines, whether it's Japanese food or Western dishes.

The Meaning of Our Logo

Our logo depicts a five-petal soba flower. 'Five' also implies 'Go-koku', or five grains, which is a generic term for grains or crops. Five petals revolve around a central point to form a circle, which symbolizes the flour milling business Nikkoku Seifun has been promoting. The space on the upper-right side indicates dynamism and spaciousness, suggesting further development of Nikkoku Seifun.

Corporate Color

The color blue conjures images of water and the sky, which represents the Earth. It is in essence the vital force of life. In addition, the color of blue expresses not only cleanliness, freshness, and vigorousness, but also calmness and relaxation.
